The Bridges out of Poverty program represents a powerful tool for change. Based on Dr. Ruby Payne's myth-shattering book, "*A Framework for Understanding Poverty*," Bridges reaches out to the millions of service providers and businesses whose daily work connects them with the lives of people in poverty.

Building the Framework Advanced Overview:

1. Hidden Rules & Mental Models

Identify "Hidden Rules" of generational poverty and how they impact in your work. Create "Mental Model" of your organization's service to people in generational poverty. Explore how this relates to the "Hidden Rules" of generational poverty just identified.

2. Language

Distinguish between the different registers of language. Experience "Jodi's Story." Practice with verbal examples comparing classes' story structure. Role play language examples.

3. Resources

Identify eight resources of generational poverty and how resources and relationships are intertwined. Identify strategies to engage consumers in the workplace based on the resource theory.

4. Making a Plan

Learn the Bridges model for change and make a plan for how you can use Bridges concepts in your daily work.

3.5 CEU's approved for Counselor, Social Work, and Marriage & Family Therapists through Consolidated Care, Inc.
